

# Sennheiser Tourguide Rate Card

Sennheiser developed a simple radio system intended for tour parties at Stately Homes, museums and factories etc. This equipment has also proved ideal in other situations where a guide and the audience are all on the move - especially if the ambient noise level is high. It has also proved highly effective as a way of distributing simultaneous translation to an audience. The package is compact and is designed to be easy to use.

## ANALOGUE TOUR GUIDE

This system operates in the VHF band (48 Mhz - 55 Mhz), and is analogue.

Each system comprises a hand held transmitter (PP3 powered) and a quantity of stethoset receivers fitted with rechargeable batteries. The system case contains a stethoset charger.

- 49 Mhz frequencies (3) **NO LICENCE REQUIRED** 3 channel receivers
- 48 Mhz frequencies (3) need a licence 3 channel receivers
- 54 Mhz frequencies (3) need a licence Single channel receivers only

We can arrange the licence for you, but there is a minimum licence fee of £27.00. Bookings can only be confirmed when a licence is granted. Please allow at least 3 working days for the application to be processed by the Licensing authority.

	Daily	Weekly
